DATA SHARING

You need to let us know if you wish to opt out of any of the services below :

Summary Care Record

A Summary Care Record is an electronic record which contains information about the medicines you take, allergies you suffer from and any bad reactions to medicines you have had.

Having this information stored in one place makes it easier for other healthcare staff to treat you in an emergency, or when your GP Practice is closed.

I DO NOT WANT my Summary Care Record shared with other Healthcare Professionals	
--	--

Signature of Patient	
-----------------------------	--

Name and Signature on Behalf of Patient	

Your Care Connected

This is a more **detailed record** that can be **shared with local hospitals and community services** throughout Solihull, Birmingham and Sandwell. This enables all organisations to share important details of your medical history along with investigations, test results, medication etc.

The aim is to improve communication across local GP's, hospitals and community services and helps avoid duplicating investigations such as blood tests.

National Opt-Out Facility

You can choose whether your confidential patient information is used for research and planning.

Who can use your confidential patient information for research and planning?

It is used by the NHS, local authorities, university and hospital researchers, medical colleges and pharmaceutical companies researching new treatments.

Making your data opt-out choice

You can choose to opt out of sharing your confidential patient information for research and planning. There may still be times when your confidential patient information is used: for example, during an epidemic where there might be a risk to you or to other people's health. You can also still consent to take part in a specific research project.

Will choosing this opt-out affect your care and treatment?

No, your confidential patient information will still be used for your individual care. Choosing to opt out will not affect your care and treatment. You will still be invited for screening services, such as screenings for bowel cancer.

What should you do next?

You do not need to do anything if you are happy about how your confidential patient information is used.

If you do not want your confidential patient information to be used for research and planning, you can choose to opt out securely online or through a telephone service.

You can change your choice at any time. To find out more or to make your choice visit nhs.uk/your-nhs-data-matters or call 0300 303 5678

Application for Online Access to Your Medical Record

Important Information – Please read before returning the Online Access Form

If you wish, you can now use the internet/mobile phone to book appointments with a GP, request repeat prescriptions for any medications you take regularly, look at your test results, Immunisations and medical records all online. Also, you can still call the surgery for any queries regarding the above services. It's your choice.

It will be your responsibility to keep your login details and password safe and secure. If you know or suspect that your record has been accessed by someone that you have not agreed should see it, then you should change your password immediately.

If for any reason you cannot do this, we recommend that you contact the practice so that they can remove your online access until you are able to reset your password.

If you print out any information from your records, it will be your responsibility to keep this safe and secure. If you are at all worried about keeping printed copies safe and secure, we recommend that you do not make copies at all.

Before you apply for online access to your record, there are some other things to consider.

Although the chances of any of the following happening are very small, you will be asked if you have read and understood the following before you are given login details from our Staff Member. **If you wish to have access to your Online Medical Record please ask at Reception for a Form to complete.**

Forgotten history

There may be something you have forgotten about in your record that you might find upsetting.

Abnormal results or bad news

If your GP has given you access to test results or letters, you may see something that you find upsetting to you. This may occur before you have spoken to your doctor or while the surgery is closed and you cannot contact them.

Choosing to share your information with someone

It's up to you whether or not you share your information with others – perhaps family members or carers. It's your choice, but also your responsibility to keep the information safe and secure.

Coercion

If you think you may be pressured into revealing details from your patient record to someone else against your will, it is best that you do not register for access at this time.

Misunderstanding Medical Information

Your medical record is designed to be used by clinical professionals to ensure that you receive the best possible care. Some of the information within your medical record may be highly technical, written by specialists and not easily understood. If you require further clarification, please contact the surgery for a clearer explanation.

Information about someone else

If you spot something in the record that is not about you or notice any other errors, please log out of the system immediately and contact the practice as soon as possible.

More information

For more information about keeping your healthcare records safe and secure, you will find a helpful leaflet produced by the NHS in conjunction with the British Computer Society: Keeping your online health and social care records safe and secure
<http://www.nhs.uk/NHSEngland/thenhs/records/healthrecords/Documents/PatientGuidanceBooklet.pdf>
